# What is Knowledge?

- It can be said that while data is essentially numbers and letters without meaning, data presented in a context that makes sense is information. **Knowledge is further developed when information is combined with experience, context, interpretation and reflection** (Gottschalk, 2004, p. 16).
- **Knowledge** has also been defined as **the ability to discriminate within and across contexts**.
- Knowledge as a field of study denotes the ways in which actors in particular social situations understand and make sense of what they are doing (Swan, 2008, p. 750).

# Knowledge Management

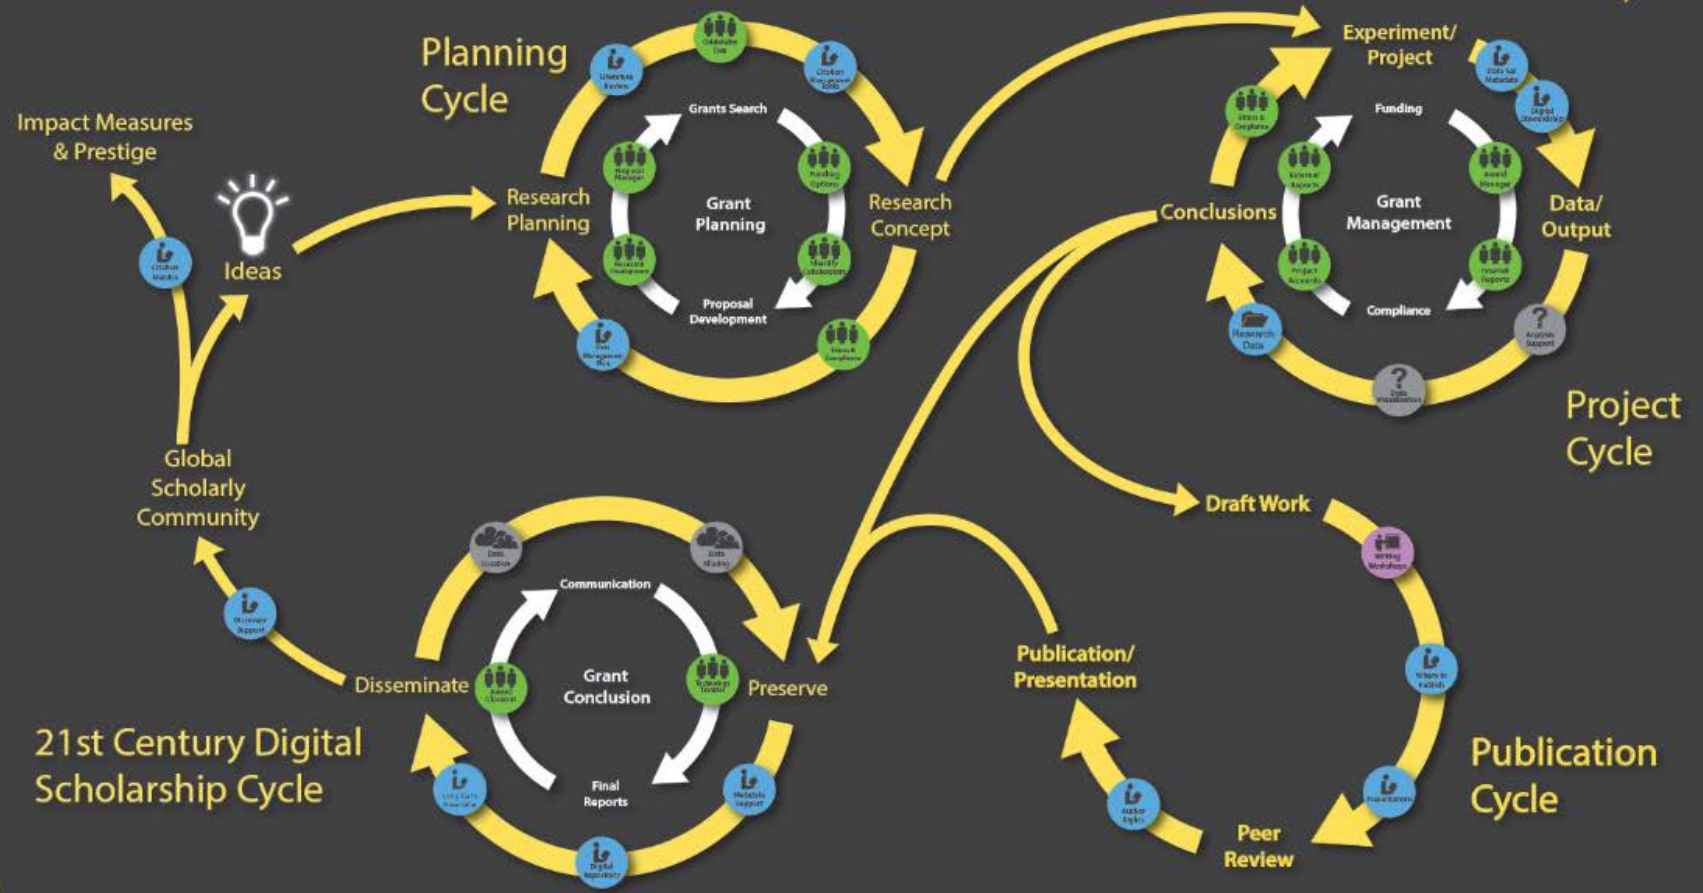

- Knowledge management is the systematic management of an organization's knowledge assets for the purpose of creating value and meeting tactical & strategic requirements; it consists of the initiatives, processes, strategies, and systems that sustain and enhance the storage, assessment, sharing, refinement, and creation of knowledge.

# What role do the libraries have in knowledge management?

The library is a complex web of data, information and knowledge.

Books and journals must be catalogued and organized in a way that is logical to our users. The users should be given further instruction on how to use databases and reference sources. Also, as the information landscape is changing, the use of library services is changing and the librarians' role is changing.

It appears that the focus of librarians has been mainly on information management and how information can be provided to library users in order for them to translate it into knowledge.

# Tudóstér – Profile Database of the University of Debrecen <https://tudoster.idea.unideb.hu>

UNIVERSITY of  
DEBRECEN

The screenshot shows the Tudóstér website interface. At the top left is the logo 'IDEA TUDÓSTÉR'. To the right is a login section with a text input field containing 'jparagh', a password field with dots, and a submit button. Below the login fields are links for 'Registration' and 'Forgotten Password?'. A navigation bar contains icons for 'Home', 'Person', 'Unit', 'Request data', and 'Links', along with 'Help' and 'Contact' links. A central message box reads: 'Tisztelt Felhasználók! A Tudóstér adatfeltöltő űrlapja megújult, így a közleményeiket egyszerűbben feltölthetik. Részletes leírást a SÚGÓban találunk. Kérdéseiket, észrevételeiket a publikaciok@lib.unideb.hu e-mail címre várjuk. Az IDEa Tudóstér munkatársai'. Below this is a welcome message: 'Welcome to the IDEa Academic Profiles. The profile and research database of the University of Debrecen offers up-to-date information about our researchers' academic achievements and scientific work. The database includes profiles of individual researchers, university units and PhD students. The Profiles contain information about:'. A bulleted list follows: 'personal data, affiliation, teaching and supervising activities, publication list, statistics and scientometrics related to the publications.' Below the list is a note: 'All researchers of the University of Debrecen may apply for an IDEa Profile. Please log in here with your eduID and fill in the appropriate form.' On the right side, there are navigation tabs for 'Person', 'Unit', 'Publication', and 'Help', a search bar with the text 'search persons' and a 'Search' button, and a calendar for '2019. april' showing dates from 1 to 30. At the bottom, there is a 'RESEARCHERS' section with four portrait photos of individuals. On the far right, there are three vertical banners: 'TUDOMÁNY', 'TEHETSÉG', and 'Portálkapu'.

## REQUEST CERTIFIED PUBLICATION LIST

Tisztelt Felhasználóink!  
Az ÁOK vezető kutatók, oktatók ösztöndíj pályázathoz a könyvtár nem készít hitelesített listát.

A kért összesített impakt faktor a Tudóstéren a kutató profiljából kérdezhető le. (nyomtatható verzió)  
További kérdéseiket a publikaciok@lib.unideb.hu címre várjuk.

A független citációkra vonatkozó adatok az MTMT rendszeréből kérdezhetőek le.  
Ezzel kapcsolatos kérdéseiket az mtmt@lib.unideb.hu címre küldhetik.

# Open Access

- Open access is a broad international academic **movement** that seeks free and open online access to academic information, such as publications and data. When anyone can read, download, copy, distribute, print, search for and search within the information, or use it in education or another way within the legal agreements, the publication is called 'open access', as there are no financial, legal or technical barriers.

UNIVERSITY *of*  
DEBRECEN

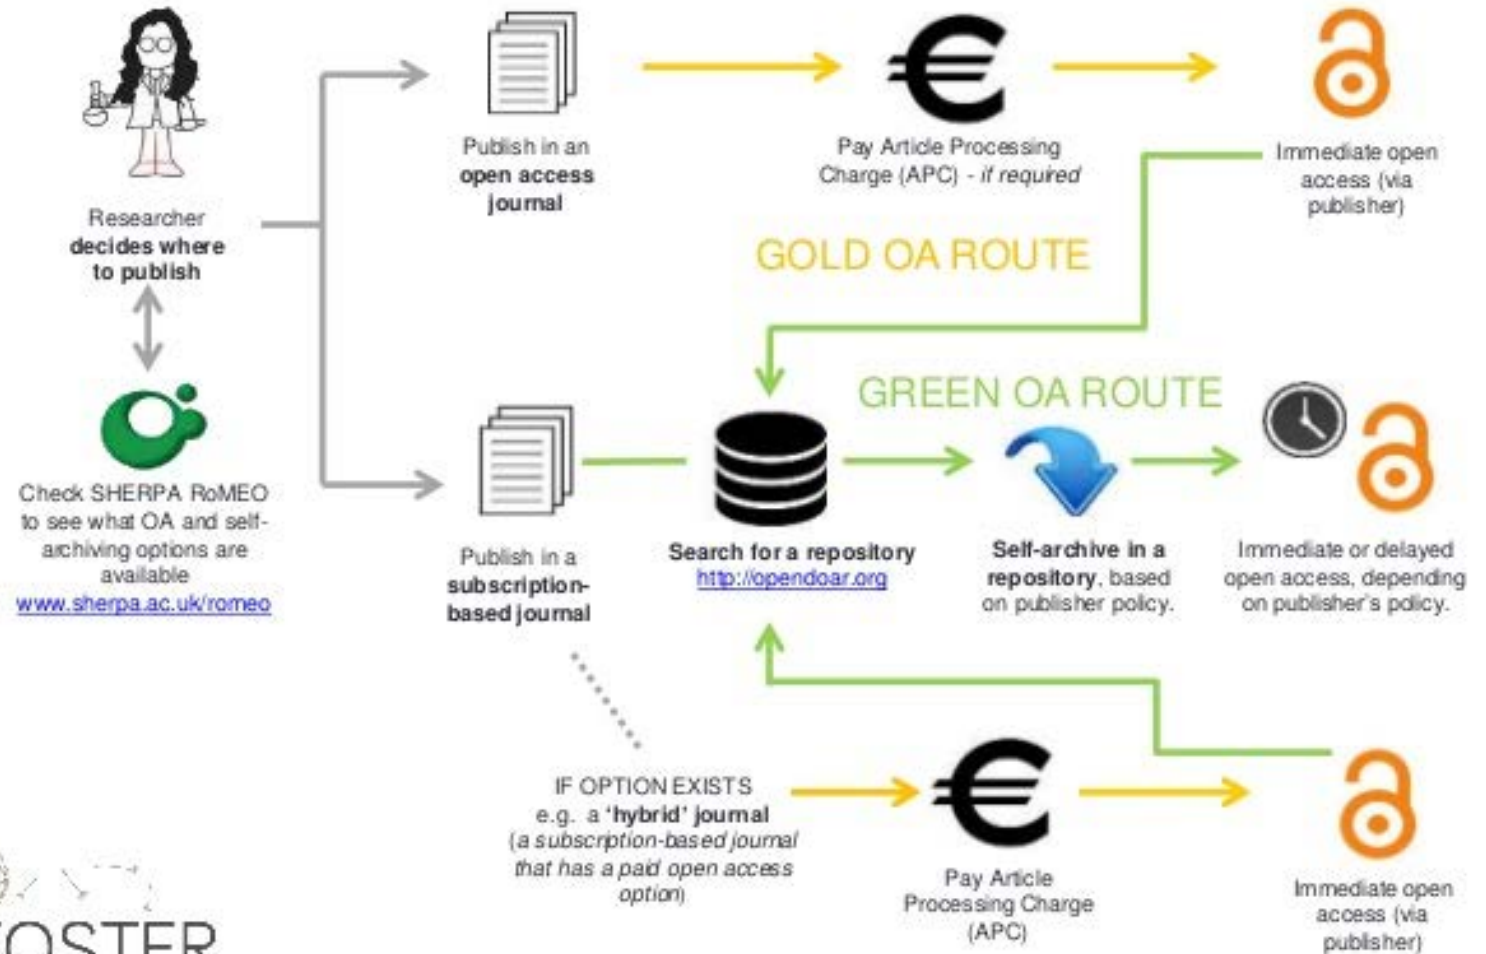

# Benefits of Open Access

CC-BY Danny Kingsley & Sarah Brown

# Open access publication

UNIVERSITY of  
DEBRECEN

# Types of Open Access

- Green OA – self archiving (mostly delayed open access)
- Gold OA – open access journal with article processing charge (APC)
- Platinum OA – free open access
- Hybrid – subscription journal offer for individual articles APC

# Self-Archiving

- Pre-print (submitted manuscript)
- Post-print (accepted manuscript)
- Publisher version

UNIVERSITY *of*  
**DEBRECEN**

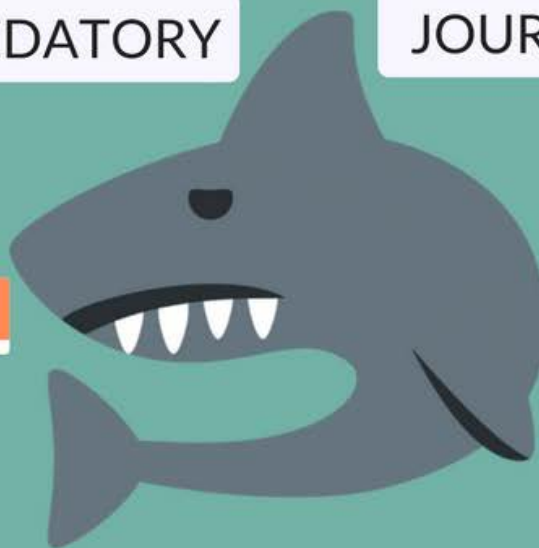

# Predatory Journals

- The term "predatory journal" or "predatory publisher" was coined in 2010 by American librarian Jeffrey Beall to describe unscrupulous open access publishers who were publishing articles with little or no real peer review. One business model in open access is article-processing charges, under which accepted articles are paid for by the authors (gold OA) (or usually their funder or institution).

# PREDATORY JOURNALS

Look for these to identify predatory journals!

- Do not have Web of Science impact factors or SCImago journal rankings.
- Do not or improperly use permanent identifiers such as ISSN or DOI.
- Charge unusually high or low article processing charges (APCs).
- Have unprofessional websites with deadlinks and grammatical errors.
- Use generic email accounts (Gmail or Yahoo) for correspondences. No accurate headquarter location.
- Do not have clear policy on copyright licensing, open access, or retraction.
