Mobile health service search app

UNIVERSITY of  
DEBRECEN

Let us give you a brief introduction to the conception behind University of Debrecen's health services search app. It's a mobile app which

allows the user to have up-to-date access to information related to the University's health services

# UD MEDIVERSITY

## Mobile health service search app

### MAIN FUNCTIONS

#### DOCTOR SEARCH

Allows you to find a doctor quickly, giving information about specialist services, locations or consultations.

#### SPECIALIST SEARCH

Information about consulting times and locations, and about the doctors providing the services.

#### LOCATION SEARCH

You can search on the map, or through the list of locations which provide services, as well as use the navigation and call support, and a lot more.

### SUPPLEMENTARY FUNCTIONS

#### BLOOD PRESSURE DIARY

#### MEDICAL DOCUMENT STORAGE

#### FAVOURITE DOCTOR

#### SAVED CONSULTATIONS

### WHY IS THE APP BETTER?

- Initiates an immediate navigation and telephone call service
- Scalability, with further development possibilities: direct access, statistics, information, enables important messages to be delivered safely
- Works offline: information is available even when there's no Internet service
