

Name of the course:

Modelling of Manufacturing Technologies

Course type:

optional

Responsible lecturer:

Dr. Sándor Bodzás

Content:

Determination of blank geometries. Technological design for manufacturing od blanks. Computer aided manufacturing (CAM) of manufacturing and strategies and simulations. Optimization of tool paths. Determination of machining time and components. Cost calculations. Manufacturing plan of complex surfaces. Determination of technological parameters, tool selection and machine selection. Finite element simulation of manufacturing processes. Computer aided design and modelling of special manufacturing tools. Design of quality assurance process for manufacturing process. Application of Lean manufacturing in industrial circumstances. Design of special workpiece fixtures for special technological tasks. Computer aided assembly process plan for special workpiece and tool fixtures.
